## THE JUDICIARY AND THE PRESS.

The telegraph brings us intelligence of a conflict between a Chicago paper and one of the Courts of that city. This journal made some strictures on the conduct of the Court, and the latter retaliated by arresting the publisher for contempt. This is a great abuse of the powers of the judiciary, and is stretching their authority far beyond the limits intended by the laws, defining and punishing contempt of court. A very broad construction has been placed upon the latter, for the purpose of protecting the courts and enforcing their process and decrees, but it was never intended to become a retaliatory power against public opinion or a just criticism by the journals of the day. Such proceedings are an abuse of the privilege which is entirely indefensible. Judges are the public servants, and their courts form the machinery by which the public weal is advanced. They are not the masters, nor are their tribunals above comment or censure of the public. Clothed as the judges of courts properly are with a large discretionary power, they must recollect that it is not given them for arbitrary use, or for furthering personal ends, but rather to give them the necessary protection, and their orders the requisite force to promote the ends of justice. When these extensive powers are otherwise used than for an abuse, which, if persisted in would have the effect of bringing judicial authority into discredit and destroying its usefulness. The proper remedy for a judicial officer who may believe that he has been unjustly accused or made the subject of injurious censure, is to apply to the law to establish his innocence, or to punish his willful means of an action for libel. That is the only lawful redress for the public in general, and judges are for transcending their just privileges when they attempt to use any other. When they do, it only can be deemed an offensive use of their judicial authority, which should go far to prove that they are justly obnoxious to criticism. It is of no avail for any Judge or Court to attempt to gag or intimidate the public press; it is the duty of the latter, not only to report the proceedings had in the courts of the country, but to point out in just and reasonable terms such matters that call for remark or censure. When such an eminently proper course is attempted to be punished and energy stifled, by taking arbitrary proceedings in the nature of those had for contempt in its proper legal sense that itself shows that the Judge who so misconducts himself is not fit for the position he holds. Such men should be taught by the sternest censure that when they overstep the line of their official duty, they are so amenable to public opinion, against which their station, no matter how high, will not serve as a shield.

## STATE AND COUNTY TICKETS.

The counting of votes of this, the principal precinct of Lincoln county, having closed, we are enabled to form a tolerably just estimate of the result of the contest in the county. Kendall will probably obtain 250 majority; Sewall, for Supreme Judge, about 200; Lewis, State Printer, about 250 majority. Of the county ticket, it appears that the Democrats will elect one Senator, two if not three Assemblymen, District Attorney, Treasurer, Surveyor, Superintendent of Public Instruction, three County Commissioners, and Public Administrator. The Republicans will certainly elect one State Senator, Sheriff and County Clerk, leaving one Assemblyman and Assessor doubtful. It is probable the latter will not be decided until the official count. On the township ticket the Democratic candidates for Justice of the Peace, Constable and School Trustees are all elected.

The returns are simply confirmatory of what we stated a day or two since, that if the Democrats had remained united, they would have swept the field. Personal differences and animosities were taken advantage of by the opposite party and caused the defeat of candidates that were eminently worthy of receiving the undivided support of their party, a result that we believe even those who caused it, on taking a second thought will sincerely regret.

**ARBOR DAY.**—The S. F. Bulletin is advocating the establishment of an Arbor day in California, that is giving a prize every year to the person that shall plant the most trees before a certain date in each year, the condition being exacted that the trees shall be thrifty and growing. In Nebraska Arbor day has already become an institution.

The San Francisco Millerites predict that the end of the world will take place in the year 1898.

## JUDGE GARBER.

We are reliably informed that this gentleman has resigned his position on the Supreme Bench of this State, and will at once resume the practice of his profession, of which he is so distinguished an ornament. Though doubtless the change will be the source of greatly increased profit to Judge Garber, yet we cannot but regret it, as it deprives the people of the State of the services of one of the ablest jurists that have ever practiced within its limits. The Judge's great natural abilities, which were peculiarly adapted to forensic studies, his vast store of legal learning and experience, combined with the most scrupulous integrity, rendered his position in the Supreme Court of peculiar value to the people of Nevada. But while regretting his resignation, simply regarding it from a public point of view, we have no doubt that the Judge has acted wisely, for there is, no doubt, that the income from his professional practice will very largely exceed the emolument of the Judgeship. We understand that Judge Garber will shortly visit Pioche with the intention of making a lengthened stay. We take this opportunity of offering him a cordial welcome with our best wishes for his continued prosperity.

**ENORMITY.**—Italy seems to be the theatre of unusual disasters. A few days since the river Po overflowed its banks and caused a terrible destruction, both of life and property; on the 5th the town of Palazzolo was visited with a violent hurricane. In Great Britain a total failure of the potato crop is reported, while the grain crop is said both to be greatly damaged and to fall far below an average in quantity. To add to these afflictions, for the poorer class, fuel is commanding excessively high prices. All these calamities make the prospect of the poor, for the coming winter, to be black indeed. Looking at these present and prospective misfortunes from a distance, the people of the United States, especially of the Pacific coast, have abundant reason to be thankful for plentiful harvests and general prosperity.

**ELECTION RETURNS** from other parts of the State are very meagre and unreliable. Many private dispatches have been received from various localities, but they afford but little information. From the telegrams that have come and our notice it seems conceded that Kendall has been elected to Congress. Of the other candidates on the State ticket but little has come to hand and that little seems to be mere conjecture.

**ENGLISH OPINION.**—The Republicans have been very fond of quoting from the English papers, when the latter were lauding Grant. Probably they will not think so much of Johnny Bull's idea, when he tells them some unpalatable truths respecting the corruption of the Republican party.

The Messrs. Winans, who built the celebrated "cigar ship," have applied for and received an extension of their patent. From this it appears that they have still faith in the usefulness of this singular model for ship building. The Winans have sunk \$1,000,000 in their attempt to perfect and introduce their invention.

San Francisco is blessed with a citizen of French descent who imagines that some horrible fate is in store for him, and for that reason never suffers himself to be left alone night or day. He is decidedly averse to solitary contemplation, and is appreciative of company.

The Salt Lake Herald says that winter has set in in good earnest at Cottonwood Canyon and found many of the mines unprepared for the winter campaign. In consequence of this a number of mines will be closed until next spring.

**KENDALL.**—A dispatch from Eureka states that Kendall has carried Lander county by 150 majority.

Another telegram from Virginia says that he carried Storey county by 200 majority.

Great complaints are being made against the Central Pacific for refusing to carry passengers to their destination, who have stopped over at an intermediate station.

On Saturday last, while returning to Carson from Virginia, two gentlemen named Bostwick and Hutchinson were thrown out of their buggy and much injured, though not fatally.

**STILL ANOTHER.**—San Francisco is to have another monster hotel. It is to be located near the new Branch Mint and City Hall.

The Cholera has appeared in a malignant form at Prague, Vienna, and Frankfurt-on-the-Main.

The development of the wonderful and apparently inexhaustible mineral resources of Australia continues on a scale which promises speedily to revolutionize the entire commercial and business situation of the Pacific.

The French papers announce that Mr. Reed, late chief constructor of the English navy, is offered \$200,000 a year to organize the German fleet, but at the instance of the British admiralty he declined Bismarck's tempting proposal.

The White Pine News says that they had a fine top dressing of snow on the day of election at Hamilton.

**THE EXODUS FROM ALSACE.**—A very large number of the self exiled population of Alsace and Lorraine are now arriving in the United States. It is a very touching and mournful spectacle to see many thousands of people leaving their homes, and in many cases all their worldly substance, rather than change their allegiance from the country in which they were born. The exodus from these provinces has been so great that in some places scarcely a man is left who is fit for military duty. We are glad to notice that a society has been formed in New York for the reception and assistance of these immigrants, several thousand of whom have already arrived with more to follow.

The famous firm of free lovers, Madames Woolhull and Chadin, have come to grief. In the issue of November 21 of their weekly paper was contained an atrocious attack on the Rev. Ward Beecher and Mrs. Tilton, intimating that an amour was being carried on between them, which was quietly parried by Theodore Tilton. This was too bad and the result of it was that the twain of lady editors found themselves in the Ludlow street jail on the double charge of libel and publishing obscene publications.

The S. F. Grand Jury advises the passage of an ordinance forbidding the employment of girls under eighteen years of age in melodeons, and also to prohibit the presence of boys and girls as spectators in such establishments.

Robert M. Lee, one of the counsel who defended the Brotherhoods in San Francisco, has been indicted for attempting to influence a juror. The technical name of the offence is embracery.

A whole family in Kentucky were poisoned by eating blight in which arsenic had been used for saturation. That kind of "raising" is not calculated to promote longevity.

The immense grain crops of California has given quite an impetus to the building of sailing vessels for the purpose of carrying the grain to European markets.

The S. F. Bulletin says that Occident in his race with Lucy, "broke up and foundered like a vicious mule on a treadmill."

Alfred A. Mace, formerly a practicing attorney in Marysville and Virginia, and now a resident of San Francisco has been indicted for adultery by the Grand Jury of that county.

**DIAMOND FIELDS.**—In the following extract the San Francisco Chronicle gives some hints of the proposed operations of this company:

The trustees of the New York and San Francisco Commercial Company (Roberts) are quickly making their preparations for a thorough, exhaustive and most working of their diamond fields. They are well aware that the danger and difficulties attending their working are considerable—not so much from the Apache and the weather as from the white man. Ordinary men employed at an average salary cannot withstand great temptations; and if one of their employees would in his labor pick up a magnificent 100-carat stone he might be tempted. Aside from this "tempter" will doubtless soon find the "find" after the Roberts party get to work. Salaries don't often tempt men to risk their lives; but let a man know that he is defending his own estate, and he will fight like a fiend. The Roberts Company's idea seems to be to let out their fields on shares, or rather making the hunting of diamonds a co-operative affair in which the company and the hunters of the precious stones shall be in "echoes."

The idea has met with much favor among the interested, and measures have been taken to perfect such an organization. Co-operative in character, only men of honesty, ability and "gumption" will be admitted as members of this arrangement. We give the programme as we hear it on the street, there being no reason to doubt the correctness of the main idea. When the snows clear off in the spring, three hundred able bodied men will be hard at work proving to the world, and the London diamond merchants in particular, that diamonds exist on the American continent. That California will lose quite a number in population owing to the exodus to the diamond fields, is a fact that must be conceded; but it will be for the benefit of California in the end. All the stones found will be sent here, and San Francisco will become the central diamond market in the United States.

On the 4th, ground was broken for the Wasatch and Jordan Valley Railroad, by the officers of the corporation, in the presence of several of the stockholders and invited guests. The road will be of three feet gauge and will run from Sandy station to Alta City, in Little Cottonwood Canyon. The company have secured from the Utah Southern road the three and a half miles of excellent road bed constructed last summer towards the mouth of Little Cottonwood, which leaves less than three miles to grade to reach the entrance to the canyon. Seven miles of iron have been ordered, and trains will be running over this extent of road by December 25th. The preliminary survey, completed last week, shows some heavy work, but no great difficulties to be surmounted. The elevation, at the point, is about 4,100 feet above Sandy station—an average of 200 feet to the mile for the entire 16 miles of the road. If the season proves favorable, work will be actively prosecuted without cessation until the completion of the railroad. In this event the entire line will be in operation in season for the opening of business next spring.

Salt Lake City rejoices in a powerful new steam fire engine.

Grass Valley, Cal., is at present enjoying the sensation of a haunted house.

## Telegraphic Dispatches.

SPECIAL TO THE POCHE DAILY RECORD

EASTERN.

Newark, N. J., Nov. 7.—Grant's majority in this State is nearly 14,000.  
Little Rock, Ark., Nov. 7.—Indications from returns now in are that Baxter is elected Governor, and that Arkansas has gone for Grant by 2,000 to 3,000. Hodges, Rep., is probably elected to Congress in the first district, Snyder, Rep., in the second, and Gunther, Dem., in the third.  
Topeka, Kan., Nov. 7.—The Republican State Central Committee figure Grant's majority in Kansas at 30,000.

Nashville, Nov. 7.—If subsequent figures make no change the Congressional delegation will stand eight Republicans to two Democrats. It was not expected that the Republicans would carry, under the new apportionment, more than two districts, and the Democrats do not yet give up Homer in sixth district, but concede the election of Maynard. The Republicans expected no such result, and are astonished at the prospect of Brown's defeat. The Republicans have made large gains in the Legislature.

New York, Nov. 7.—Revised returns to 9 o'clock to-night give Grant 47,717 majority in the State, while Dix is over 1,000 votes ahead, having over 48,851 majority. Each is likely to exceed 50,000.

Detroit, Mich., Nov. 7.—Grant's majority is 55,000 to 60,000. All the Republican Congressmen are elected by majorities from 1,500 to 8,000. The State Senate is entirely Republican and in the House there are not more than seven or eight Democrats out of 100 members.

Montgomery, Ala., Nov. 7.—Large gains indicate the election of the Republican State ticket.

Louisville, Nov. 7.—It is believed that Grant has carried four of the ten Congressional districts, with two doubtful, and four certain for Greeley. The Republicans concede the State has gone for Greeley by 7,000 to 10,000.

Reports of the horse disease are untrue. Dubuque, Iowa, Nov. 7.—Sixty counties give Grant 42,782 majority. The total majority in the State will be 56,000. All the Republican Congressmen are elected.

Philadelphia, Nov. 8.—The funeral of General Meade takes place Monday. The City Council will attend in a body. Independence Hall will be draped in mourning thirty days.

Baltimore, Nov. 8.—Greeley's majority will be less than 2,000. The Congressional delegation will probably be three Republicans to three Democrats.

Boston, Nov. 8.—The mutilated body found in the Charles River is identified as that of Elijah Ellis.

Cincinnati, Nov. 8.—The steamboat Kate Wright, with 150 passengers on board, is reported sunk in the Mississippi, near Helena, Arkansas. No lives lost.

St. Louis, Nov. 8.—Greeley's majority in this city is 2,755. O'Connor polled 336 votes. Democrats carry Second and Third Congressional Districts and the Republican the First. Legislature estimated to stand as follows: Senate—13 Republicans, 18 Democrats and 3 Liberals. Assembly—38 Republicans, 54 Democrats and 1 Independent. The Republican gives from 71 counties Greeley a majority of 18,294. Total majority in the State estimated at 28,000.

Washington, Nov. 8.—The President continues to receive congratulatory dispatches. One from Mosley says Virginia has gone for Grant.

The Diplomatic Corps called in a body and congratulated the President.

Chicago, Nov. 8.—Washington specials say, in speaking of speculations in regard to the Cabinet changes, that representative colored men, headed by Fred Douglass and J. M. Larrison, colored lawyer, are bringing a pressure to bear to secure a Cabinet appointment for one of their race, and the Washington Star of last evening says the movement is already on foot to have Larrison appointed Attorney General.

Portland, Or., Nov. 8.—The subsidy granted by the Legislature to the Portland, Dallas and Salt Lake Railroad is estimated to be worth \$3,000,000.

Salt Lake, Nov. 8.—Dispatches from J. P. Jones to private parties in this city indicate that Nevada has gone Republican by 1,500. Republicans have a majority on joint ballot in the Legislature of 20, and that Kendall is elected to Congress.

Advices from Idaho show that Haley, Democrat, is elected Delegate to Congress by a substantial majority.

**FOREIGN.**  
London, Nov. 7.—The Presidential election in America is the principal topic in the morning papers, the prevailing sentiment being favorable to the Administration. The chief subject of complimentary notice is the orderly manner in which the elections were conducted. Much surprise is expressed at the completeness of the Republican triumphs.

City of Mexico, Nov. 1, via Havana, Nov. 7.—The election for President of Mexico resulted in the almost unanimous choice of Lerdo de Tejada. The votes against him were few and scattering. The programme which the President proposes for himself is made public and may be condensed in this phrase: "Lit-

tle politics and much administration." Boreira Diaz has sent in his own surrender of his command. It is reported that Tejada intends to restore Diaz and Trevino to their former rank in the army.  
London, Nov. 8.—Subscriptions are being raised for the Italian sufferers.

## GENERAL ITEMS.

The Carson State Register says that Dr. M. A. Schlosser, the renowned surgeon-chiropractor and everlasting destroyer of corns, bunions, and all diseases of the feet, let down on foot, forgetting to pay his printing and hotel bills. In order that the Doctor may have one more "well-known" testimonial to his list "we hereby take great pain in stating that Dr. Schlosser charged us out of a number of dollars, with considerable pain and skill. We take pleasure in recommending him to printers and hotel keepers as a first class blk."

The trip of Senator Cole through Northern California in the interest of a narrow gauge road to run from Benicia to Red Bluffs has been successful. Large subscription shares have been taken up in the upper end of Colusa, as well as Butte and Tehama counties. No subsidies are asked for, and a guarantee is given farmers that their grain will be carried to market for at least half the present prices of freight. At Benicia a donation of the water front and right of way has been offered.

We regret to learn that work has been suspended on the Pennsylvania coal mines situated about fourteen miles north of this city. Said mines have been worked under the auspices of the Central Pacific Railroad Company, and coal in paying quantities was found, but owing to the fact that the Central Pacific Company have a large contract pitting with the owners of the Evansville coal mines, they suspended operations here until said contract expires. [Elko Independent, 2.]

A fatal accident occurred in the Emma mine early yesterday morning. A Cornishman named Richard Dike was at work in the mine, when he was caught by a cave and buried under several tons of ore and rock. His fellow laborers heard his groans and immediately endeavored to rescue him, but before he could be extricated, life was extinct. This casualty is another warning of the imperative necessity of substantially timbering the mines at Cottonwood. [S. L. Herald, 31.]

Last Wednesday a brakeman on the U. P. was running on top of some cars, near Euston, when in consequence of some ice on the cars he slipped and fell to the ground, the cars passing over one of his arms, breaking it in three places. His watch was smashed to pieces, and the back of his head was somewhat injured. [Oden Junction, 2d.]

Mr. Dawson, of Lincoln, Nebraska, died yesterday at the Great Western Hotel, of consumption, also his child, eight months old, of congestion of the brain. Mrs. Dawson, who is also here accompanying her husband, is almost frantic in consequence of her bereavement. [S. L. Tribune, 4th.]

It is said that a man at the bottom of a deep well can see stars in the day time. It is a fact. A man in Michigan in this advanced position for astronomical observation, saw quite a galaxy of stars of various magnitudes recently. A brick fell on his head from the top of the well.

The Empire City Mining Company's furnace at Railroad street started last week, and with a five day's test demonstrated that the ores smelt easily, and three tons of crude ore produced one ton of bullion. A slight defect in the machinery rendered it necessary to shut down for a few days. [Elko Independent, 2.]

Black Ryan, on the General Staff of the Central Pacific Railroad, arrived at today's stage and paid the sum of \$28,800 in gold coin into the County Treasury, being the sum of the railroad taxes for the present fiscal year. [Silver State, 2d.]

The Carson Register says for some months past, Governor Stanford has been laboring under a severe attack of the horse disease. At last accounts he was considered convalescent.

Mr. George H. Taylor, of Lathrop & Co., while adjusting some of the machinery, had his left hand caught in a saw, severing off the thumb and offing it, and further painfully injuring the hand. [S. L. Herald, 3d.]

The Oxford University (England) celebrates its thousandth anniversary this year. It has an annual income of one million dollars.

The Central Pacific Railroad Company on Thursday paid into the County Treasury \$10,000 taxes for the current year. [Silver State, 2d.]

The Visalia (Cal.) are bound to have a narrow-gauge railroad to connect with the Western Pacific.

Ditch speculators are said to be exporting part to England in consequence of the high price of coal.

An immense stratum of gold bearing gravel has been struck east of Forest Hill,placer county, California.

The Missouri Democrat strongly urges the building of a through narrow gauge railroad from the Atlantic to the Pacific.

The Pioche stage did not arrive until 11 o'clock this morning, on account of heavy roads. [W. P. News, 5th.]

A new Grammar School building has been opened by Bishop Tuttle in Salt Lake. It is attended by 330 scholars.

MARGINS.—Judge Agnew, of the Pennsylvania Supreme Court, at Pittsburgh, in his decision in the case of Bursell vs. Kilpatrick, the oil case, draws a distinction between gamblers and speculators, which is interesting to operators in stock. The Judge says substantially that all dealers who operate on margins only, without investing or intending to invest any other capital in the business than just enough to pay their "differences," are gamblers, and as such are not entitled to the protection of the law in enforcing their contracts.
